RE: Decision of PET ACCESS to Ignore Patients just as Cancer Care Ontario 'medical experts' have ignored Ontario PET experts and physicians for almost 15 years.

Dear Panel Members.

As expected you have not produced the documents making it clear that I cannot order PET scans on patients, and in particular patients that I have been consulted on. There WILL be more patient applications to follow. Each and every case will be fully documented and copied to the physicians and patients involved and all my communications with PET ACCESS and lack of responses to both me and the patients will be tabulated and recorder carefully.

The message you have given to patients by refusing to answer their questions, or even respond to them could not be clearer.

WHAT IS ESTABLISHED:

1. PET ACCESS PANEL members are knowingly using scientifically baseless methodology to assess whether or not a patient in Ontario will be allowed to have a PET scan or not.
2. The PET ACCESS PANEL is REFUSING to answer legitimate questions from well informed patients.
3. The PET ACCESS Panel has tried to shut down the education of physicians and patients by falsely claiming that I cannot order PET scans.

Regards

Dr. Dave Webster
